LASERFICHE CLOUD

Laserfiche Cloud Features

LASERFICHE CLOUD

Laserfiche Cloud is enterprise content management with built-in business process management tools in a secure and scalable Software-as-a-Service (SaaS) subscription. It enables organizations to securely manage and share documents, emails and other content as they flow through organizational processes.

FORMS

Forms in Laserfiche Cloud allow process managers to create and publish web forms with an intuitive forms management system requiring no coding or scripting. Attractive forms can be easily created with preconfigured templates or customized with editable fonts, colors, uploaded images and layout options. A wide variety of form elements, including fields, checkboxes and radio buttons, can be dragged onto a form to collect the exact information you need, in the precise format you require. A Payment Collection option allows for payment to be collected with Braintree Payment Gateway.

A customizable landing page for Forms makes finding and viewing processes easier. Selected forms appear as thumbnails on a landing page, with a customizable URL for users to access directly.

CONTENT CAPTURE

There are many options to capture content in Laserfiche Cloud:

- Laserfiche Scanning allows you to easily convert paper documents into convenient electronic records in Laserfiche.
- Laserfiche Snapshot allows you to quickly print an archival image version of any file type to Laserfiche
- **The Laserfiche Cloud** website allows you to import files directly from your computer using dragand-drop.
- Laserfiche Import Agent automatically uploads content from local storage as soon as it is detected.
- Quick Fields Complete advance capture for all full users.

BUSINESS PROCESSES

The routing of a form is diagrammed through a process modeler, which is based on the **Business Process Model and Notation** (BPMN 2.0) standard. Different web forms can be associated with each step of the business process, allowing form creators to tailor the presentation of information for the specific step and/or users.

INTEGRATIONS

Laserfiche Cloud also has built-in integrations to connect you with core applications:

- The **Office Plug-in** allows you to quickly save **Microsoft Office®** documents to Laserfiche, and work with them from within Laserfiche. You can also use the Office Plugin to quickly archive emails from Microsoft Outlook® and capture information about the emails.
- Import files saved in Microsoft Office®, Google Drive®, OneDrive® and OneDrive for Business® directly into Laserfiche.
- **DocuSign®** allows you to request signatures on your document (DocuSign account is needed).
- Laser App® provides forms filling solutions for broker-dealers, financial advisors, insurance agents, and others in the financial industry (Laser App account is needed).

LASERFICHE MOBILE APP

The Laserfiche Mobile app (Android, iOS, or Windows) enables you to capture, upload, and securely access documents, complete tasks and submit electronic forms inside Laserfiche while on the go–even save content and folders while offline.

You can browse for documents in a folder structure; search all your content; create, copy, move, rename, download, print, and delete documents; modify document fields; and view annotations; additionally, you can add documents to your Laserfiche repository from other apps, the mobile device's gallery, or its camera. Users can add tags to documents and folders, place documents under version control, and check them in and out.

AUDIT TRAIL

Auditing enables you to track activities performed in a Laserfiche repository. The tracked information is efficiently stored in log files that are processed for use in reports. Combined with other aspects of the Laserfiche system, auditing not only helps to show compliance with legal regulations, but also contributes to the security of the Laserfiche repository.

CONNECTOR

Laserfiche Connector provides a streamlined experience for integrating Laserfiche with line-of-business applications such as Customer Relationship Management (CRM) and Enterprise Resource Planning (ERP) systems. A Laserfiche Connector profile can be configured to run a search, assign templates and fields to search results, scan a document, import a document, open a website, start another application, or write information to an application.

ACTIVE DIRECTORY FEDERATION SERVICES (AD FS)

Account Administrators can provide single sign-on to Laserfiche Cloud through **Active Directory Federation Services**. Properly mapped user accounts choose 'Sign in with ADFS' on the log-in page to sign into Laserfiche Cloud without specifying an additional username or password.

To ease administrative burden, the single sign-on configuration page includes a look up button to automatically retrieve configuration information from the AD FS host.
